Schedule

Estimated Lead Time:

6 weeks

Estimated Downtime/Schedule:

3 weeks

Installation Facilities

- Little Rock, AR
- Melbourne, FL
- Reno, NV
- São Paulo/Catarina, BRAZIL
- St. Louis, MO

Upgrade Your Falcon Entertainment System to a Full Surround Sound System

Alto Aviation and Dassault Falcon Jet have worked together to bring the home theater experience to your Falcon cabin. The Alto nVELOP Surround Sound System is designed specifically for the aircraft cabin using proprietary surround decoding techniques to provide true surround sound for all of the cabins passengers regardless of whether they face forward or aft. Proprietary design software has been used to acoustically map Falcon interiors and optimal speaker locations have been chosen to provide the best audio performance for your specific cabin layout. This mapping allows the engineers to custom design equalizers to compensate for any negative acoustic effects of the interior shape and layout of the cabin. Proprietary Sinewatch™ circuitry integrated in the amplifiers allows for full volume operation without distortion.

System components include very high efficiency mid/high frequency enclosures, high output subwoofer enclosures, and powerful yet lightweight amplifiers with pre-set custom integral equalizer and crossovers, depending on model and floor plan. Warranty is 5 years on amplifiers and 10 years on speakers.
