30 Days

Estimated Downtime/Schedule:

25 days

Installation Facilities

- Little Rock, AR
- Reno, NV
- São Paulo/Catarina, BRAZIL
- St. Louis, MO
- Stuart, FL

Upload Your Aircraft Databases With Ease Using the DL-1000 Data Loader

Once Falcon Elite II Baseline is implemented, the DL-1000 Data Loader is one of many Elite II options that will enhance your operational capabilities.

The DL-1000 data loader uses SD card or USB 2.0 technology to upload aircraft, navigation, and custom databases as well as aeronautical charts and maps. The USB 2.0 technology allows you to upload your data from a standard USB drive you can buy “off-the-shelf” with a 1GB capacity or larger.

Falcon Family

When you own or operate a Falcon, you become part of the Falcon Family. Throughout the life of your Falcon, our dedicated team of professionals will bring you the unrivaled skill, experience and passion to guarantee your satisfaction.
