

Features & Benefits

- State-of-the-art router with 802.11ac technology
- Capable of handling high speed connectivity systems such as Jetwave
- Cost effective solution
- Light weight router: 4.2 lbs.
- Capable of cellular connectivity
- Consumes only 30 watts of power

Schedule

Estimated Lead Time:
30 days

Estimated Downtime/Schedule:
~ 1.5 weeks (if done separately)

Installation Facilities

- Little Rock, AR
- Melbourne, FL
- Reno, NV
- São Paulo/Catarina, BRAZIL
- St. Louis, MO

Big Performance in a Small Router

Honeywell's GoDirect Router offers big performance in a small package. In the most important advancement in router technology in years, Honeywell has reinvented the airborne router by slashing size, weight, and power consumption without sacrificing any of the speed, performance, or reliability today's operators need.

No longer do you have a router taking up lots of valuable real estate in the avionics bay. The GoDirect Router measures just 8.2x5.6x1.75 inches compared to something in the 2 MCU range. It weighs just 4.2 pounds, compared with about 8 pounds for a full-size router. Instead of the 50-watt power appetite of a typical router, the GoDirect Router only demands around 30 watts.

Falcon Family

When you own or operate a Falcon, you become part of the Falcon Family. Throughout the life of your Falcon, our dedicated team of professionals will bring you the unrivaled skill, experience and passion to guarantee your satisfaction.

Falcon Family Benefits

- OEM trained technicians
- OEM approved tooling
- OEM supported solutions
- OEM accepted design standards
- OEM factory logbook sign-off
- 8 Convenient locations and an additional MRU area
- Priority service from Dassault Service Engineering
- No sales tax on labor, materials, or vendor services
- FalconAdvantage program
- No mark-up on Dassault parts
- No mark-up on Dassault service engineering
- Firm fixed pricing on discrepancies
