- Fuselage mount antenna (allows for SBB SATCOM retention)

High-Speed Internet In-Flight

LOW EARTH ORBIT SATELLITE NETWORK

Starlink is the world's first and largest satellite constellation in low Earth orbit to deliver high-speed, low-latency internet anywhere across the globe.

As of August 2024, SpaceX's Starlink constellation has 6,500+ active satellites.

VIDEO STREAMING & VIRTUAL MEETINGS AT ANY ALTITUDE

- Starlink can deliver up to 220 Mbps to each terminal, enabling all passengers to access streaming-capable internet at the same time.
- Enjoy unprecedented in-flight experiences with latency below 99 MS, enabling seamless 4K video calls, online gaming, virtual private networks, and other latency-dependent activities.
- Starlink's low-profile Aero Terminal features an electronically steered phased array antenna allowing us to point at a new satellite in <1ms, which unlocks new levels of reliability, redundancy, and performance.
- Starlink's custom built navigation sensors survey the stars to determine each satellite's location, altitude, and orientation, enabling precise placement of broadband throughput.
