

Viasat Ka Band

Features & Benefits

- No maximum speed limits (no cap set on the speed delivered to a terminal)
- Typical speeds greater than 20 Mbps with peaks exceeding 90 Mbps
- Forward compatibility with satellites, speeds, and future services
- Growing global coverage
- Seamless transition between coverage areas
- Affordable global and regional unlimited connectivity plans available

Finally, a Ka Band Solution to Fit Your Budget

Viasat knows that time is money and that staying connected in-flight is crucial to business continuity. Falcon passengers need the same connectivity in the air as they expect in the office.

Viasat's Ka Band solution enables superior connectivity by connecting your aircraft with high-capacity satellites to transmit data back and forth. This allows you to connect your devices to your aircraft like the way you connect to Wi-Fi on the ground. As your aircraft travels through the air, the system stays connected between coverage areas, much like your mobile phone does when you are in a car.

Schedule

Estimated Lead Time:
 90 days

Estimated Downtime/Schedule:
 ~30 days

Installation Facilities

- Little Rock, AR
- Melbourne, FL
- Reno, NV
- São Paulo/Catarina, Brazil

■ Current Ka coverage
 ■ Ka coverage ViaSat-3A
 ■ Ka coverage ViaSat-3B
 ■ Ka coverage ViaSat-3C
