

Features & Benefits

- Increased number of accessible airports
- Lower minimums than standard LNAV/VNAV GPS approaches
- GPS horizontal / vertical guidance down to 200 ft. minimums (near ILS Cat I minimums)
- Maximized commonality with ILS or LNAV-VGP approaches
- Compatible with WAAS, EGNOS and SBAS

Schedule

Estimated Lead Time:
4 weeks

Estimated Downtime/Schedule:
10 days

Installation Facilities

- Little Rock, AR
- Melbourne, FL
- Reno, NV
- São Paulo/Catarina, BRAZIL
- St. Louis, MO

Customize Your Flight Deck With Operational Enhancements - EASy II Options

Once EASy II Baseline is implemented, the Wide Area Augmentation System - Localizer Performance with Vertical Guidance (WAAS-LPV) capability is the first of many EASy II options to enhance your operational capabilities.

By removing dependence on ground stationed navigational aids, WAAS-LPV gives you access to more than 3,000 extra approaches (principally in the US).

This feature offers lower minimums than standard LNAV/VNAV GPS approaches, near ILS Category I minimums with no ILS on the field. The capability proposed is compatible with WAAS, as well as the European Geo Navigation Overlay System (EGNOS) and is expected to be also compatible with other future Space-based Augmentation Systems (SBAS).

EASy II WAAS-LPV

Aircraft

Falcon 7X
Falcon 900EX EASy
Falcon 900DX
Falcon 900LX
Falcon 2000EX EASy
Falcon 2000DX
Falcon 2000LX

Dassault Falcon Jet Service Center Locations

- Little Rock, AR
- Melbourne, FL
- Reno, NV
- St. Louis, MO
- São Paulo Catarina, BRAZIL
- Mobile Repair Units (GoTeam only)
 - Stuart, FL
 - Denver, CO area
 - Teterboro, NJ area
 - Van Nuys, CA area

Within this option, the GPS modules and GPS antennas are required to have been upgraded to now support SBAS services.
