- FAA / EASA approval through API STC

Schedule

Estimated Lead Time:
4 weeks

Estimated Downtime/Schedule:
10 weeks

Installation Facilities

- Little Rock, AR
- Reno, NV

Upgrade your Falcon 50 or Falcon 50EX with High-Mach Blended Winglets™ by API

Designed in cooperation between Aviation Partners, Inc. (API) and Dassault Aviation, winglet technology helps boost performance and fuel savings for the Falcon 50 series aircraft.

The winglets and winglet installation kits are purchased by the operator directly from API. The winglets and associated components will be installed using OEM wing tooling.

The end result is an aircraft with increased range (an estimated 5% increase for operators cruising at Mach .80 and over 7% at LRC*). It also includes an exclusive LED anti-collision/navigation light system for greater reliability.

*See API website www.aviationpartners.com for specific details.

Falcon 50 / EX Winglets

Aircraft

Falcon 50EX

Falcon 50

OEM production approved tooling will be utilized for the installation of the new winglets.
