- FAA / EASA approval through API STC

Schedule

Estimated Lead Time:

4 weeks

Estimated Downtime/Schedule:

10 weeks

Installation Facilities

- Little Rock, AR
- Melbourne, FL

Upgrade Your Falcon 900 With High-Mach Blended Winglets™ By API

Winglet technology helps boost performance and fuel savings for the Falcon 900 family.

The winglets and winglet installation kits are purchased by the operator directly from API. The winglets and associated components will be installed using OEM wing tooling.

The end result is an aircraft with increased range (as specified on the API website, an estimated 5% increase for operators cruising at Mach .80 and over 7% at Long Range Cruise*). It also includes an exclusive LED anti-collision/navigation light system for greater reliability.

*See API website www.aviationpartners.com for specific details.

Falcon 900 Series Winglets

Aircraft

Falcon 900EX

Falcon 900DX

Falcon 900EX EASy

Falcon 900C

Falcon 900B

Falcon 900A
