

Features & Benefits

- Interfaces with virtually any existing cabin management system
- Minimal downtime
- No PSU modifications needed
- Accurate realistic tonal balance of vocals and music
- Dramatic bass improvement over existing system
- Solid dynamic performance at full concert volume

Upgrade Your Falcon Entertainment System to the Latest High-End Audio System

Alto Aviation and Dassault Falcon Jet have cooperated to bring the latest in audio system technology to your Falcon cabin. The Alto direct replacement system brings the perfect balance between high-end audio performance and minimal interior modifications. The speakers drop right in to your existing locations without any need to re-layout the Power Supply Units (PSUs). Subwoofers are installed in the factory locations with minimal work and all factory speaker wiring is used. Proprietary design software has been used to acoustically map Falcon interiors and custom design equalizers have been designed to compensate for any negative acoustic effects of the interior shape and layout of the cabin. Accurate audio reproduction allows the music to be heard as the artist intended. Proprietary Sinewatch™ circuitry integrated in the amplifiers allows for full volume operation without harsh distortion.

System components include very high efficiency mid/high frequency enclosures, high output subwoofer enclosures, and powerful yet lightweight amplifiers with pre-set custom integral equalizer and crossovers, depending on model and floor plan. Warranty is 5 years on amplifiers and 10 years on speakers.

Schedule

Estimated Lead Time:

6 weeks

Estimated Downtime/Schedule:

3 weeks

Installation Facilities

- Little Rock, AR
- Melbourne, FL
- Reno, NV
- São Paulo/Catarina, BRAZIL
- St. Louis, MO

Aircraft

- Falcon 7X
- Falcon 900EX
- Falcon 900DX
- Falcon 900EX EASy
- Falcon 900C
- Falcon 900B
- Falcon 900A
