 - Growth to support up to 8 displays and 8Gb of data
- Display System Weight Reduction
 - Each Display Unit is about 7 lbs. lighter. Replacing 5 displays will save about 35 lbs.
- Display Reliability
- New Display Warranty
 - 24 Month Warranty
- Reduced Cost of Ownership
- Ease of Maintenance
 - Maintenance Page
 - Five columns of test data
- Increased Aircraft Value

LCD DISPLAY UNITS

Convert your existing Cathode Ray Tube (CRT) displays to the more capable and reliable Liquid Crystal Displays (LCD). The LCD displays incorporate internal computing power to allow operators to incorporate technology previously only available to newer aircraft. Electronic moving maps, electronic charts, XM Graphical Weather charts and other new flight deck features are just a few of the new options available with the DU-875 installation.

This upgrade does not require any structural modification or additional pilot training. It also requires minimal wiring. A new cursor control device and the DL-1000 data loader are included with the installation.

SCHEDULE

Estimated Lead Time:

30 Days

Estimated Downtime/Schedule:

25 Days
