ABOUT

Situated at the Melbourne - Orlando International Airport in Florida, Dassault Falcon Jet's newest facility is a 120,000 sq. ft. maintenance facility capable of handling a full range of inspection, repair and overhaul activities from line maintenance through C checks, as well as engineering and modification services. It is fully equipped with workshops, customer offices and lounges, along with a large warehouse with a large inventory of FalconSpares. The site is also home to a two-bay 48,000 sq. ft. state-of-the-art paint shop.

CAPABILITIES

- Scheduled Maintenance
 - Up to & including C inspections
- Engines
 - Honeywell authorized TFE731 / CFE738 Line Service Center
 - Pratt & Whitney 307 / 308 Engine Line Service
- Avionics installations and upgrades
- Interior upgrades and refurbishments
- Engineering: avionics, electrical, and structural
- Major and minor damage repairs

ABOUT

Dassault Falcon Jet relocated its service center in Brazil, known locally as “Falcon do Brasil” from the Sorocaba Airport to the new São Paulo Catartina Executive Airport in São Roque, SP, Brazil.

The new facility exceeds the criteria to qualify as a Line service center capable of servicing up to five Falcons at once. With 32,300 sq. ft. of hangar space, São Paulo Catartina has plenty of room for the larger Falcon 6X and 10X. Plans are in place for growth and expanded service offerings.

CAPABILITIES

- Scheduled Maintenance
 - Up to & including B inspections
- Airframe maintenance
- Engines
 - Honeywell authorized TFE731 / CFE738 Line Service Center
 - Pratt & Whitney 307 / 308 Engine Line Service
- Avionics installations and upgrades
- OEM engineering
- Minor damage repairs
- Pre-Purchase Evaluations (PPE)

ABOUT

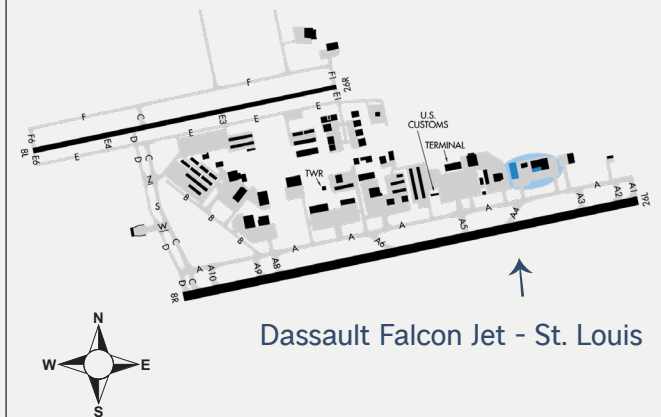

The Dassault Falcon Jet - St. Louis, Missouri location is one of two satellite service centers in the United States. This facility is unique because of the small shop feel with the OEM expertise and support. This location has long been a favorite among customers.

St. Louis has the parts, tooling, and certifications required to perform calendar and flight hour inspections on the Falcon 6X, 7X and 8X, as well as the Falcon 900, 2000, and 50 series aircraft.

CAPABILITIES

- Scheduled Maintenance
 - Up to & including B inspections
- Airframe maintenance
- Engines
 - Honeywell authorized TFE731 / CFE738 Line Service Center
 - Pratt & Whitney 307 / 308 Engine Line Service
- Avionics installations and upgrades
- OEM engineering
- Minor damage repairs
- Pre-Purchase Evaluations (PPE)
